

Yoga Rost® Floor grid

Applications

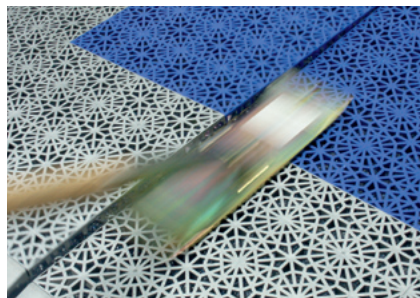

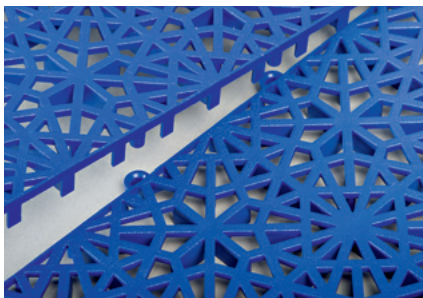

Yoga Rost is the ideal flooring for trade fairs, big events and automobile showrooms. The material is also perfectly suitable for use in wet areas in swimming pools, showers and changing rooms. Yoga Rost can be used for work-station places and also under machinery.

The benefits at a glance

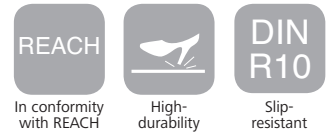

- The 14 mm thick flooring reduces noise and provides efficient insulation against cold floors.
- Resistant to UV radiation and cold down to -18°C.
- Resistant to most common oils, petrol and chemicals.
- The grid structure provides easy drainage of liquids.
- In combination with corners and edge strips, the flooring allows cargo transport and resists loads of up to 220 t/m²
- Can be used for all floors where a dry, slip-resistant surface is desirable.
- Hard-wearing and completely maintenance-free.

Instructions for use and cleaning

- The Yoga Rost tiles can be easily assembled and disassembled
- Can be easily cut easy to size with a fretsaw
- Easy to clean with high- pressure cleaners

Properties

In conformity with REACH

High-durability

Slip-resistant
